\*DOUBLE REBATE DOORS ARE AN OPTIONAL UPGRADE VS STD 44MM DOOR AND INCUR A SURCHARGE

Hallmark Doors is proud to release the HallmaxPro slab, a brand-new 70mm double rebate composite door, now available to design, quote, and order through the Hallmark Door Designer.

The introduction of HallmaxPro further cements Hallmark's position as offering one of the most comprehensive product ranges in the industry, with options including standard composite doors, FD30 fire doors, stable doors, uPVC panels, and aluminium panels - and now, premium double rebate composite doors.

## The Benefits of a Double Rebate Composite Door

Designed without compromising the popularity of Hallmark's trusted standard composite doors, the HallmaxPro offers enhanced performance for customers seeking that extra level of specification:

- **Enhanced Security:** The double rebate design adds further strength and resistance against forced entry.
- **Enhanced Soundproofing:** Ideal for homes located near busy roads, providing increased noise reduction.
- **Enhanced Thermal Efficiency:** Achieving better energy performance and reduced heating costs.
- **Double Weatherseal Protection:** Two weatherseals deliver superior defence against draughts and water ingress.

A detailed diagram is available to showcase the technical advantages of the double rebate system.

## HallmaxPro: Now Live on the Hallmark Door Designer

The HallmaxPro can be fully configured through Hallmark's industry-leading Door Designer, giving installers and trade customers the ability to instantly create quotes, check lead times, and place orders with ease.

“Our customers asked for a double rebate option that matched the quality and reliability Hallmark is known for,” said Hallmark, “HallmaxPro delivers on that – it's the perfect addition for installers looking to offer premium performance without complexity.”
